(PLEASE RETAIN THESE DETAILS
FOR FUTURE REFERENCE)

STEP 1:

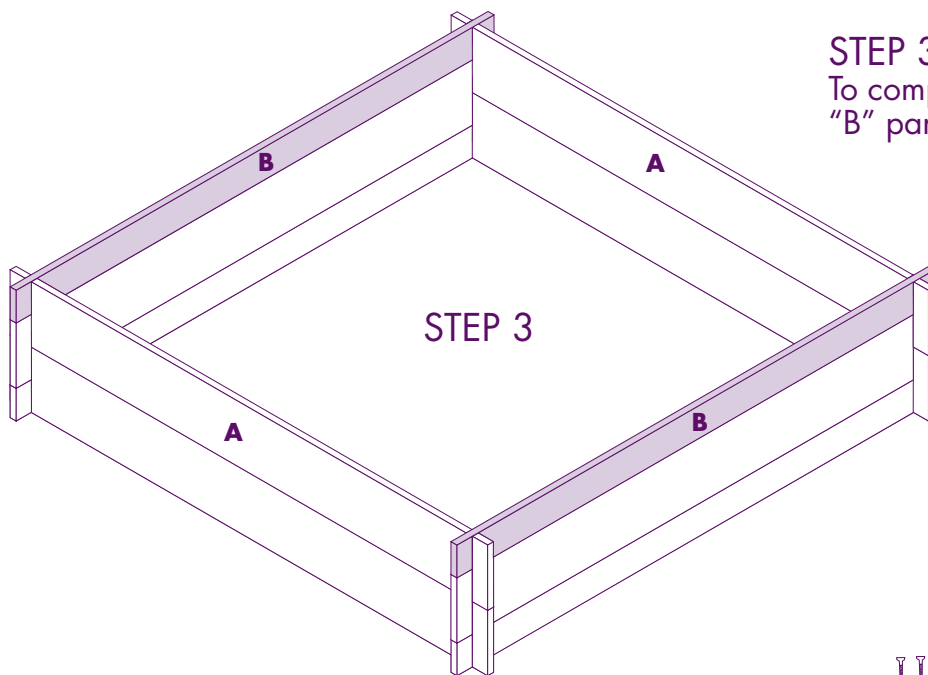

Slot two "A" panels into two "B" panels by sliding cut-outs into one another (Detail 1) and push down to secure firmly. Note: Ensure the sand pit base is perfectly square prior to step 2.

STEP 2:

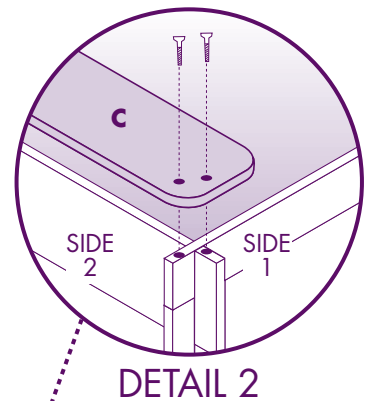

Repeat step 1 for all remaining "A" panels to create the four sides of the sand pit.

CAUTION: WOOD PRODUCTS MAY PRODUCE SPLINTERS, SO CARE SHOULD BE EXERCISED DURING ASSEMBLY.

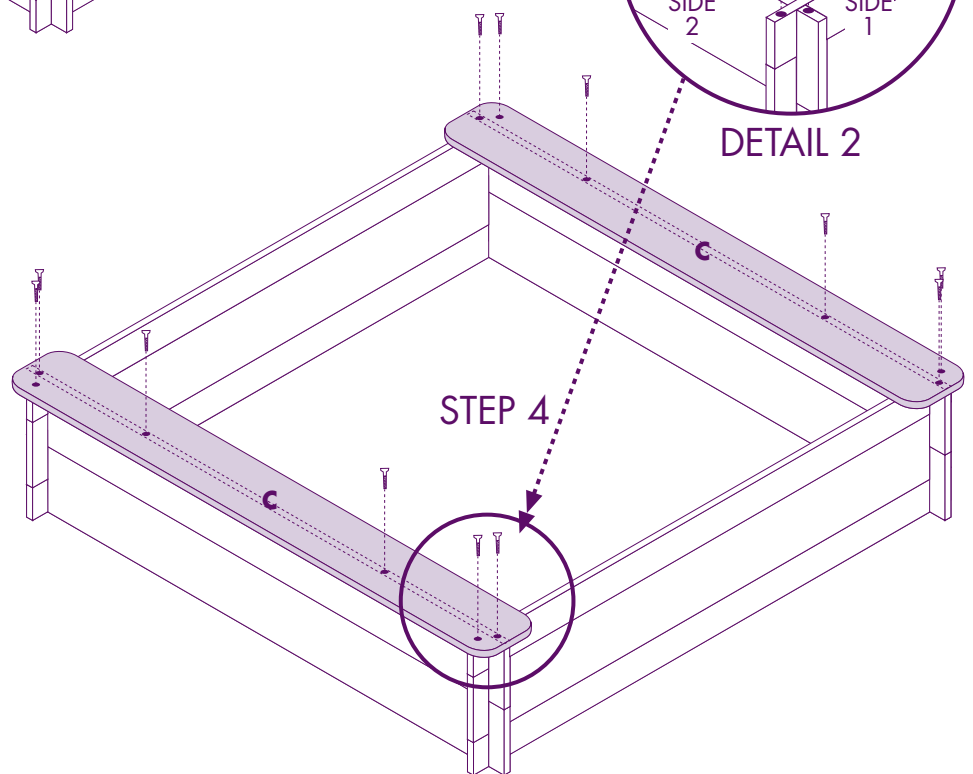

STEP 3:
To complete the sandpit, slot the last two "B" panels into two "A" panels.

STEP 4

STEP 4:
Screw seats "C" to sides through pre-drilled holes (Detail 2) using six 35mm screws per seat.

STEP 5:
Place sandpit on top of ground-cover on level ground. Fill with sand.

Keep your sandpit safe for the children

1. Always cover the sandpit when not in use, to prevent unwanted animals from playing in the sand.
2. Before covering your sandpit, place a large object in the center of the sand to prop up the cover. This will allow water to drain off the cover, and prevent any rain water from "pooling" in the center of the sandpit. This must be checked regularly.
3. **Should any water still accumulate and form a pool, please ensure that this water is removed as standing water can pose a danger to children.**
4. Regularly check sand for impurities and any other sharp objects that may cause harm to children.
5. Use washed playsand suitable for use in children's sandpits.
